

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Attorney Docket No. 065905-0248

In re patent application of

Takafumi NAKAHAMA

Serial No.: Unassigned

Filed: February 8, 2002

For: COOLING DEVICE FOR HEAT STRUCTURE

PRELIMINARY AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Sir:

Prior to examination of the above-identified application, Applicant respectfully requests that the following amendments be entered into the application:

IN THE SPECIFICATION:

Please amend the specification of the application as follows:

Please replace the paragraph on page 5, lines 15 through 16, with the following:

--Figures 1A through 1C show cross-sectional views of a prior art cooling device for a heat source;--

Please replace the paragraph on page 5, lines 17 through 19, with the following:

--Figures 2A through 2C show cross-sectional views of a cooling device for a heat source according to a first embodiment of the present invention;--

Please replace the paragraph on page 5, lines 20 through 22, with the following:

--Figures 3A through 3C show cross-sectional views of a cooling device for a heat source according to a second embodiment of the present invention;--

Please replace the paragraph on page 5, lines 23 through 25, with the following:

--Figures 4A through 4C show cross-sectional views of a cooling device for a heat source according to a third embodiment of the present invention;--

Please replace the paragraph on page 6, lines 1 through 3, with the following:

--Figures 5A through 5C show cross-sectional views of a cooling device for a heat source according to a fourth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 4 through 6, with the following:

--Figures 6A through 6C show cross-sectional views of a cooling device for a heat source according to a fifth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 7 through 9, with the following:

--Figures 7A through 7C show cross-sectional views of a cooling device for a heat source according to a sixth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 10 through 12, with the following:

--Figures 8A through 8C show cross-sectional views of a cooling device for a heat source according to a seventh embodiment of the present invention;--

Please replace the paragraph on page 6, lines 13 through 15, with the following:

--Figures 9A through 9C show cross-sectional views of a cooling device for a heat source according to an eighth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 16 through 18, with the following:

--Figures 10A through 10C show cross-sectional views of a cooling device for a heat source according to a ninth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 19 through 21, with the following:

--Figures 11A through 11C show cross-sectional views of a cooling device for a heat source according to a tenth embodiment of the present invention;--

Please replace the paragraph on page 6, lines 22 through 24, with the following:

--Figures 12A through 12C show cross-sectional views of a cooling device for a heat source according to an eleventh embodiment of the present invention;--

Please replace the paragraph on page 7, lines 1 through 3, with the following:

--Figures 13A through 13C show cross-sectional views of a cooling device for a heat source according to a twelfth embodiment of the present invention;--

Please replace the paragraph on page 7, lines 4 through 6, with the following:

--Figures 14A through 14C show cross-sectional views of a cooling device for a heat source according to a thirteenth embodiment of the present invention;--

Please replace the paragraph on page 7, lines 7 through 9, with the following:

--Figures 15A through 15C show cross-sectional views of a cooling device for a heat source according to a fourteenth embodiment of the present invention;--

Please replace the paragraph on page 7, lines 13 through 15, with the following:

--Figures 17A through 17C show cross-sectional views of a cooling device for a heat source according to a sixteenth embodiment of the present invention; and--

IN THE CLAIMS:

Please replace Claims 5, 6, and 9 with the following amended claims:

--5. (Amended) The cooling device for the heat source according to claim 2, wherein said upright plate provided on the downstream side of said header is provided offset from a center of said hole.

6. (Amended) The cooling device for a heat source according to claim 1, wherein a gap between said upright plate provided on a downstream side of said header and a wall face on a side of said header opposite said holes is eliminated.

9. (Amended) The cooling device for a heat source according to claim 6,

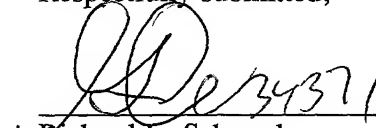

wherein a gap between said baffle plate provided on an upstream side of said holes within said heat sink and said wall face on a side of said heat sink opposite said holes is eliminated.--

REMARKS

Entry of the foregoing amendments prior to examination is respectfully requested.
A marked-up version of the paragraphs and claims showing the changes made is attached.

Respectfully submitted,

February 8, 2002

VERSIONS WITH MARKINGS TO SHOW CHANGES MADE

Paragraph on page 5, lines 15 through 16:

[Figure 1 shows] Figures 1A through 1C show cross-sectional views of a prior art cooling device for a heat source;

Paragraph on page 5, lines 17 through 19:

[Figure 2 shows] Figures 2A through 2C show cross-sectional views of a cooling device for a heat source according to a first embodiment of the present invention;

Paragraph on page 5, lines 20 through 22:

[Figure 3 shows] Figures 3A through 3C show cross-sectional views of a cooling device for a heat source according to a second embodiment of the present invention;

Paragraph on page 5, lines 23 through 25:

[Figure 4 shows] Figures 4A through 4C show cross-sectional views of a cooling device for a heat source according to a third embodiment of the present invention;

Paragraph on page 6, lines 1 through 3:

[Figure 5 shows] Figures 5A through 5C show cross-sectional views of a cooling device for a heat source according to a fourth embodiment of the present invention;

Paragraph on page 6, lines 4 through 6:

[Figure 6 shows] Figures 6A through 6C show cross-sectional views of a cooling device for a heat source according to a fifth embodiment of the present invention;

Paragraph on page 6, lines 7 through 9:

[Figure 7 shows] Figures 7A through 7C show cross-sectional views of a cooling device for a heat source according to a sixth embodiment of the present invention;

Paragraph on page 6, lines 10 through 12:

[Figure 8 shows] Figures 8A through 8C show cross-sectional views of a cooling device for a heat source according to a seventh embodiment of the present invention;

Paragraph on page 6, lines 13 through 15:

[Figure 9 shows] Figures 9A through 9C show cross-sectional views of a cooling device for a heat source according to an eighth embodiment of the present invention;

Paragraph on page 6, lines 16 through 18:

[Figure 10 shows] Figures 10A through 10C show cross-sectional views of a cooling device for a heat source according to a ninth embodiment of the present invention;

Paragraph on page 6, lines 19 through 21:

[Figure 11 shows] Figures 11A through 11C show cross-sectional views of a cooling device for a heat source according to a tenth embodiment of the present invention;

Paragraph on page 6, lines 22 through 24:

[Figure 12 shows] Figures 12A through 12C show cross-sectional views of a cooling device for a heat source according to an eleventh embodiment of the present invention;

Paragraph on page 7, lines 1 through 3:

[Figure 13 shows] Figures 13A through 13C show cross-sectional views of a cooling device for a heat source according to a twelfth embodiment of the present invention;

Paragraph on page 7, lines 4 through 6:

[Figure 14 shows] Figures 14A through 14C show cross-sectional views of a cooling device for a heat source according to a thirteenth embodiment of the present invention;

Paragraph on page 7, lines 7 through 9:

[Figure 15 shows] Figures 15A through 15C show cross-sectional views of a cooling device for a heat source according to a fourteenth embodiment of the present invention;

Paragraph on page 7, lines 13 through 15:

[Figure 17 shows] Figures 17A through 17C show cross-sectional views of a cooling device for a heat source according to a sixteenth embodiment of the present invention; and

Claims:

5. The cooling device for the heat source according to claim 2 [or claim 3], wherein said upright plate provided on the downstream side of said header is provided offset from a center of said hole.
6. The cooling device for a heat source according to [any of claim 1 to claim 4] claim 1, wherein a gap between said upright plate provided on a downstream side of said header and a wall face on a side of said header opposite said holes is eliminated.
9. The cooling device for a heat source according to claim 6 [or claim 7], wherein a gap between said baffle plate provided on an upstream side of said holes within said heat sink and said wall face on a side of said heat sink opposite said holes is eliminated.
